

ECODISTRICTS INCUBATOR

2018 Sponsorship Prospectus

Portland, OR | May 9-11, 2018

The [EcoDistricts Incubator](#) is a three-day intensive workshop designed to empower district-scale teams to integrate and achieve the rigorous performance requirements of the [Protocol sustainability framework](#). World-class faculty and facilitators guide project teams through skill session presentations, team work sessions, and mobile tours to support mastery of the Protocol.

Launched in 2012, the Incubator has welcomed over 50 project teams from 33 cities and four countries to Portland to address their district and neighborhood equity and sustainable development strategies. The Incubator introduces teams to EcoDistricts' next-generation neighborhood-building model and tool for taking action — [EcoDistricts Certified](#). This framework provides city makers with a collaborative, holistic approach to creating places where we all want to work and live.

The Incubator model is simple: bring together key stakeholders in an intense charrette-style learning environment to co-create a customized EcoDistricts Roadmap for their own catalytic projects. We work with local partners and take to the streets to leverage Portland's unique urban learning lab, showcasing cutting-edge solutions in ecological sustainability, district energy, transportation, walkability, mixed used development, equitable inclusion and workforce development.

FROM OUR ATTENDEES

“ Sometimes when we think about developing a neighborhood we think about it in fractured pieces and parts. We think about stormwater. And then someone else thinks about housing. And someone else transportation. The Incubator is an opportunity to break down all those silos and lenses and come up with a united framework. ”

– Jennifer Green, City of Burlington, VT
